About the College

Government College for Women, Narnaul is one of the premier state-run educational institutions in Haryana, affiliated with Indira Gandhi University, Meerpur, Rewari. It is a prestigious institution accredited with Grade 'B' by NAAC in September 2024 with an excellent academic track record. This college was established in the year 1988. The College has a lush green, spacious campus that provides state-of-the-art facilities to young learners. The College offers various Undergraduate Programmes in Arts, Commerce and Science Streams and eight Postgraduate Programmes in English, Hindi, History, Political Science, Geography, Commerce, Mathematics and Chemistry. This institution gives special emphasis on personality development through various clubs & cells like NSS, NCC, Youth Red Cross, Sports, Placement Cell and Women Empowerment Cell. For extracurricular activities, the college organizes various cultural, sports and literary activities throughout the year. It takes pride in having spacious classrooms, modern Science Laboratories, well-equipped smart classrooms, a well-stocked Library, a Seminar Hall and a Hostel to accommodate girls (60 capacities). The college has a sprawling campus with ultra-modern facilities. Since its inception thirty-seven years ago, the college has made rapid strides and attained tremendous progress on various fronts of society. The students have excelled in the field of education, research, sports, extracurricular and many other fields. The college aims to nurture women and equip them with the abilities to stand out in national and international reforms.

About the theme of Conference

The proposed International Multidisciplinary Conference, "World View Through the Closed Doors and Broken Windows," seeks to explore the complex realities of exclusion, silence, rupture, resistance and reconstruction in contemporary global society. The metaphor of closed doors signifies denial, marginalization, censorship and inaccessibility while broken windows represent disruption, exposure, resilience and the possibility of new perspectives. This international multidisciplinary conference aims to provide an academic platform for critical engagement with contemporary global challenges and emerging paradigms across social, cultural, political, economic, scientific and humanistic domains. It seeks to bring together scholars, researchers, academicians and professionals from diverse disciplines to promote meaningful scholarly dialogue and develop practical, policy-oriented insights. The conference emphasizes interdisciplinary and multidisciplinary approaches to examine how education, innovation, governance, technology and culture can collectively contribute to rethinking knowledge systems and shaping sustainable pathways for the future of humanity.

Conference Sub-Themes/Tracks

Department of Botany

1. Deforestation and Fragmented Plant Ecosystems
